We are Champions of Human Innovation

Since 1998, the Bluetooth® brand has championed the idea that innovations can happen faster, and technologies can reach further, if everyone and everything works together.

Found today on billions of devices around the world, Bluetooth trademarks represent and signify essential technology that makes everyday experiences more enjoyable, rewarding, safe, and social. Today our trademarks are some of the most recognized, trusted, and influential in the world—and are an asset that should be grown, managed, and protected.

Your participation in representing and promoting Bluetooth trademarks in connection with authorized products and services mirrors the responsibility of those developing the technology: to assure each experience we create is precise, consistent, coherent, and cooperative.

The Bluetooth Trademarks

Only Members of Bluetooth SIG, Inc. (“the Bluetooth SIG”) are licensed to use the Bluetooth word mark, figure mark, and combination mark and the Auracast word mark, figure mark, and combination mark (collectively referred to herein as, the “Bluetooth Trademarks”), as agreed to in the [Bluetooth Trademark License Agreement](#) (“BTLA”).

The Auracast figure mark

The Auracast combination mark

Use of the Bluetooth Primary Trademarks

Requirements of Use

Use of the Bluetooth word mark, figure mark, and combination mark (collectively, the “Bluetooth Primary Trademarks”) is only permitted under license from Bluetooth SIG, Inc.

Licensees may use the Bluetooth Primary Trademarks in association with approved products and services. When the trademarks are used in connection with a product incorporating Bluetooth® wireless technology, that product must have undergone and completed the Bluetooth Qualification Process, as outlined in the BTLA. Licensees may also use the Bluetooth Primary Trademarks to reference and promote their Bluetooth SIG membership.

Where to apply the Bluetooth Primary Trademarks

The Bluetooth Primary Trademarks may be applied on licensees’:

- advertisements
- computer programs
- exhibition stands
- posters
- packaging
- point-of-sale materials
- press materials
- properly qualified and listed Bluetooth® enabled products
- product & sales literature
- radio / TV commercials
- visual aids
- websites

To discuss use of the Bluetooth Primary Trademarks in other contexts than listed above, contact brand.manager@bluetooth.com.

Violation

The Bluetooth Primary Trademarks may not be used in a manner that could impair the goodwill associated with the trademarks or otherwise damage the reputation of the Bluetooth SIG or its Members. The Bluetooth Primary Trademarks shall therefore not be used in connection with products and services that do not enable any Bluetooth® wireless functionality or in connection with unlawful, obscene, pornographic, excessively violent, hazardous, or otherwise poor-taste activities.

Use of the Bluetooth Primary Trademarks

Use of the Registered Trademark Symbol

The Bluetooth Primary Trademarks have been registered in enough jurisdictions to be accompanied by the registered trademark symbol “®” by licensees on a worldwide basis. Please note that when using these trademarks in Canada, licensees may instead use the Marque Déposée (“MD”) designation alone or in combination with the ® symbol (e.g., “®/MD”).

The Bluetooth SIG has not obtained registration for the Simplified Chinese translation of the Bluetooth word mark in any jurisdiction. Accordingly, licensees should not use the registration symbol with that translated mark.

For information as to whether particular Bluetooth Trademarks have registered or been applied for registration in a specific country, please reference BTLA Attachment 3 or contact the Bluetooth SIG Brand Manager at brand.manager@bluetooth.com.

The registered trademark symbol “®” should immediately follow the Bluetooth Primary Trademarks whenever they appear on product packaging, products, web pages, marketing pieces, and in text. After the first and most prominent use, the “®” symbol may be omitted from the word mark.

In most circumstances the registered trademark symbol “®” should consistently be used with the Bluetooth Primary Trademarks. If use of the “®” symbol on a product, or as part of a product display, is impractical due to the small size of the respective mark or the shape or size of the product on which the mark appears, the licensee may omit the “®” symbol on such product or product display, provided that appropriate language identifying and attributing the Bluetooth Primary Trademarks to the Bluetooth SIG is included in printed materials accompanying the product (e.g., user’s guides, owner’s manuals, product brochures, product packaging, etc.) and the “®” symbol is used with the Bluetooth word mark in the first and most prominent instances in which it appears in all literature, packaging, and other materials accompanying the product.

Use of the Bluetooth Primary Trademarks

Trademark Attribution Footnote

Whenever the Bluetooth Primary Trademarks are used in a particular piece, they must be attributed with an appropriate trademark footnote.

The footnote may be presented in small type but must be large enough to be legible. Footnotes generally appear at the end of a document or on the back of a package, but may appear at the bottom of a press release or web page or the inside cover of technical documentation accompanying the product. The footnote may be translated into any language provided, however, that the Bluetooth word mark and, if applicable, the Auracast word mark remain in English or in one of the approved translations found on [page 4](#). The company name, Bluetooth SIG, Inc., must always be displayed in English. If a footnote cannot be applied on product packaging or labels due to space limitations, the footnote must be clearly printed on the product's associated printed materials.

Recommended attribution footnotes

When using only the Bluetooth Primary Trademarks:

“The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by [licensee name] is under license. Other trademarks and trade names are those of their respective owners.”

When using multiple Bluetooth Trademarks:

“The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. The Auracast™ word mark and logos are trademarks owned by Bluetooth SIG, Inc. Any use of such marks by [licensee name] is under license. Other trademarks and trade names are those of their respective owners.”

Use of the Bluetooth Primary Trademarks

Relationship to Licensee Brand; Product Naming Rule

When using the Bluetooth Primary Trademarks, it should always be apparent which company is the licensee of the trademark(s); therefore, the Bluetooth Primary Trademarks should always be secondary to a licensee's house mark or other trademark. The Bluetooth Trademarks cannot be the only trademark(s) used on or in connection with a licensee's product or service.

When naming licensee products, the Bluetooth word mark may appear in a product name but, when used as such, the registered trademark symbol "R" must be added in superscript format immediately following the word mark and the word mark must be formatted in a manner designed to indicate its status as a trademark.

A licensee may not, however, embed the Bluetooth Primary Trademarks in a licensee trademark, logo, or tag line, or attempt to register or otherwise claim rights in a word mark, logo, or tag line incorporating any of the Bluetooth Primary Trademarks.

CORRECT

Using the "®" symbol with the word mark and ensuring it is secondary to the licensee mark

[Licensee Mark] Bluetooth® Watch

[Licensee Mark] Bluetooth® Wireless Headset

INCORRECT

Not using the "®" symbol with the Bluetooth word mark in a product name, not using a licensee mark in the product name

[Licensee Mark] Bluetooth Speakers

Bluetooth Headphones

INCORRECT

Using or attempting to register a logo or tag line that incorporates the Bluetooth Primary Trademarks (examples below)

LICENSEE LOGO

we make Bluetooth® headphones®

LICENSEE LOGO

LICENSEE LOGO

Bluetoothopia®

Use of the Bluetooth Word Mark

The Bluetooth SIG's rights in the Bluetooth word mark encompass all upper and lower case, bold, italicized or plain text representations of the word "Bluetooth."

Bluetooth®

Correct Form

The Bluetooth word mark should not be used as a noun. Upon first and most prominent use on any given web page, brochure, packaging, advertisement, or other marketing piece, the word mark must be followed by the phrase "wireless technology" or another secondary generic term to identify the appropriate product or service category and emphasize that the word mark is referring to a particular and authentic type of wireless technology.

- CORRECT** A notebook computer with Bluetooth® wireless technology
- CORRECT** Wireless products featuring Bluetooth® technology
- CORRECT** A company offering Bluetooth® qualification testing services

If, due to size limitations on an electronic display screen (e.g., cell phone user interface, website tabs), it is impractical to use a secondary term after the word mark, the licensee may omit the secondary term.

Spelling

The Bluetooth word mark is a trademark, and as such its spelling cannot be changed. It is always to be used in either English, its Traditional Chinese translation "藍牙", its Simplified Chinese translation "蓝牙", its Japanese translation "ブルートゥース", or its Korean translation "블루투스"; it must not be translated into other languages.

- CORRECT** 藍牙 enabled product
- CORRECT** Bluetooth® trådlösa produkter...
- CORRECT** 蓝牙™ enabled product
- CORRECT** ブルートゥース® enabled product
- CORRECT** 블루투스® enabled product
- INCORRECT** Blåtand® trådlösa produkter...

Formatting

When using the Bluetooth word mark in plain text, the letter "B" must be capitalized (i.e., "Bluetooth") in all instances. The word mark should also be made to stand out in the text by either underlining the word mark, or displaying the mark in all capitals, italics, and/or bold font on the first and most prominent use of the mark within a particular piece.

- | | |
|--|--|
| CORRECT BLUETOOTH® wireless technology... | CORRECT Bluetooth® wireless technology... |
| CORRECT <i>Bluetooth</i> ® wireless technology... | CORRECT 藍牙™ wireless technology |

Exception: The Bluetooth word mark may appear in all lowercase letters if specifically referring to or referencing the Bluetooth SIG websites (e.g., "www.bluetooth.com", etc.).

Use of the Bluetooth Word Mark

No possessives or plurals or hyphenations.

- CORRECT** The Specification for Bluetooth® wireless technology includes...
- CORRECT** Bluetooth® wireless technology enabled products...
- INCORRECT** Bluetooth's Specification includes...
- INCORRECT** Bluetooth-enabled products...
- INCORRECT** Bluetooths or Bluteeth

No verbs.

- CORRECT** Communicate via Bluetooth® wireless technology...
- INCORRECT** Bluetooth your message...

No puns.

Consistent and appropriate use of the Bluetooth Trademarks benefits all Bluetooth SIG Members. Accordingly, do not make puns out of the Bluetooth word mark or portray it in a negative manner.

No abbreviations.

As the Bluetooth word mark is a trademark, it must always be spelled correctly and in its entirety. The word mark must not be abbreviated, displayed as an acronym, or otherwise truncated, as such unauthorized modification of the mark may implicate a trademark owned by a third party (e.g., BT is a registered trademark of another company).

- CORRECT** Bluetooth® wireless technology **INCORRECT** BT wireless technology
- CORRECT** Bluetooth® Low Energy **INCORRECT** BLE

Company, Business, and Trade Names

The Bluetooth word mark must not be incorporated as part of a company, business or trade name. Only Bluetooth SIG, Inc. is permitted to use the word mark in such a manner.

INCORRECT Bluetooth Consultants, Bluetooth Enterprises, MyBluetooth, Inc.

Websites

The Bluetooth word mark is not to be used in a domain name. The only exceptions to the rule are for the domain names owned by the Bluetooth SIG (e.g., www.bluetooth.com) or when the word mark is used after the forward slash in a URL.

- CORRECT** www.companyname.com/bluetooth
- INCORRECT** www.bluetooth.se
- www.unpluggedbluetooth.com
- www.blue2th.com

Use of the Bluetooth Figure Mark

The Bluetooth figure mark, designed with inspiration from the Runic characters “H” and “B” (initials of Harald Bluetooth), is comprised of a Runic B within an oval design.

Format, Size, and Color

The Bluetooth figure mark must always be displayed in the highest quality representation. There is no minimum or maximum size requirement for the figure mark as long as, when displayed in the best possible resolution, the mark is recognizable. Licensees must use the graphic files provided by the Bluetooth SIG when using or displaying the Bluetooth figure mark. Recreating, redrawing, or otherwise reformatting the figure mark is prohibited.

The oval of the figure mark can be reproduced in blue, black, or white. When in blue, the following specification shall be used:

Pantone	CMYK
PMS 285	C: 100% M: 50% Y: 0% K: 0%
RGB	
R: 0 G: 130 B: 252	

It is also permissible to engrave or emboss the figure mark on a product, assuming its color matches the product. With the full color figure mark, the Runic B may be color matched to the solid color background (e.g., if the background is red, the Runic B may be red) or it may be white. The background and the Runic B cannot be two different colors (see limited exception, [page 13](#)). If the figure mark is printed on clear, transparent packaging, the Runic B should be left transparent such that the background color, which must be a solid color, shows through the Runic B.

Acceptable Bluetooth Figure Mark Reproduction

Unacceptable Modifications of Bluetooth Figure Mark

INCORRECT Using the Bluetooth figure mark symbol on gradient, patterned background or an image

INCORRECT Adding drop shadow, graphic emboss, or applying other graphic alterations to the Bluetooth figure mark including removing the oval or placing the Runic B in other shapes

Use of the Bluetooth Figure Mark

Free Space

Aside from the two limited exceptions discussed below, always make sure that the integrity of the Bluetooth figure mark is preserved by making use of at least a “free zone” within which no text, picture, illustration, or other element shall be present. The two exceptions to the free zone requirement are as follows:

- The registered trademark symbol “®” is to be printed as a subscript of the figure mark, as illustrated on the right, and should be displayed in the same color as the oval of the figure mark.
- The free zone may be reduced to a minimum of one-eighth ($1/8$) of the height of the figure mark when using the figure mark (standing alone) in electronic displays where size limitations prevent a larger free zone. For example, the free zone may be reduced when using the figure mark near the edge of an electronic display screen or adjacent to an electronic display divider line. It is not acceptable, however, to use a reduced free zone when the figure mark is displayed next to an informational element such as a company name, third party logo or other graphic element. This particular exception only pertains to electronic displays; all printed materials and product packaging must adhere to the standard “half the height of the figure mark” free zone requirement.

Bluetooth figure mark “free zone”

The distance between the figure mark and the edges of the free zone is equal to half the height of the figure mark as shown above.

Use of the Bluetooth Figure Mark

Use on Electronic Displays

When using the Bluetooth figure mark on an electronic display or screen, a licensee may display the Runic B component of the full figure mark in blue, black, white or another solid color that is consistent with the other icons on the electronic display. The oval design must, however, remain in blue, black or white. This is an exception to the standard figure mark guideline that the Runic B be displayed in white or color matched to the solid color background; see [page 11](#).

If, for purposes of maintaining consistency on electronic display screens or because of the nature of the electronic display, the licensee would like to use a different color for the Runic B or oval design or display the figure mark on a patterned or non-solid color background, express approval from the Bluetooth SIG must be obtained prior to such use. Please contact

brand.manager@bluetooth.com for any such requests or questions. Please note that such exceptions will only be considered for use of the figure mark on electronic displays; all printed materials, product packaging, labeling, user documentation and advertising materials must conform to the standard figure mark guidelines.

CORRECT

Using the Bluetooth figure mark with proper free space and permitted color options on an electronic display

INCORRECT

Not observing proper free space or permitted color options for the Bluetooth figure mark on an electronic display

Use of the Bluetooth Figure Mark

Use with Software Applications

When used with software applications, as with other products, the Bluetooth figure mark may not be used as a standalone icon, logo or other designation of the application.

Consistent with the guidelines on [page 11](#), licensees may not alter the figure mark when displayed on or in connection with software applications.

CORRECT

Using the Bluetooth figure mark secondary to licensee name or brand(s) for a software application

LICENSEE LOGO

APP NAME

INCORRECT

Altering the Bluetooth figure mark for use with a software application

Use of the Bluetooth Functionality Icon

To indicate activation of Bluetooth® wireless technology, or functionality of the same, licensees may use the Runic B standing alone without the oval design on products or electronic displays. When used as a functionality icon, the Runic B must be displayed in blue, black, white, or another solid color that is consistent with the other icons on the product or electronic display. The Runic B may also be engraved or embossed such that its color matches the product. To the extent necessary, licensees may also display the Runic B in use as a functionality icon in images of its product and associated user documentation.

Use of the Runic B standing alone may not be used in any other circumstance. Please contact brand.manager@bluetooth.com with any questions concerning use of the Runic B as a functionality icon.

CORRECT

Using the Runic B as a functionality icon on an electronic display

INCORRECT

Modifying the Runic B when used as a functionality icon (e.g., by placing symbols over the Runic B)

CORRECT

Engraving the Runic B such that its color matches the product, and using a solid color for the Runic B when consistent with other displayed icons

Use of the Bluetooth Combination Mark

The Bluetooth combination mark consists of:

- The Bluetooth figure mark, AND
- The Bluetooth word mark

It is strongly suggested that licensees use the combination mark whenever possible to continue building brand awareness.

Format, Size, and Color

The Bluetooth combination mark must always be displayed in the highest quality representation. There is no minimum or maximum size requirement for the mark as long as, when displayed in the best possible resolution, the mark is recognizable. Licensees must use the graphic files provided by the Bluetooth SIG when using or displaying the Bluetooth combination mark. Recreating, redrawing, or otherwise reformatting the combination mark is prohibited.

The combination mark can be reproduced in four ways: blue oval and black word mark on light background, black combination mark on light background, blue oval with white Runic B and white word mark on dark background, and white combination mark on dark background.

Use of the Bluetooth Combination Mark

It is also permissible to engrave or emboss the combination mark on a product, if this is preferred. When embroidering the combination mark on a dress shirt, it is okay to embroider it on a pin striped background. However, all other cases of embroidery should be done on a solid background.

Acceptable Bluetooth Combination Mark Reproduction

Unacceptable Modifications of Bluetooth Combination Mark

INCORRECT Altering the Bluetooth combination mark (e.g., moving the Bluetooth figure mark, moving the registered trademark symbol to the baseline of the combination mark, using the combination mark with the word "Bluetooth" in the wrong font)

INCORRECT Using the Bluetooth combination mark on gradient, patterned background or image; adding a drop shadow, graphic emboss, or other graphic altering of the mark

Use of the Bluetooth Combination Mark

Free Space

Aside from the one exception discussed below, always make sure the integrity of the Bluetooth combination mark is preserved by making use of at least a “free zone” within which no text, picture, illustration, or other element shall be present. The one exception to the free zone requirement is that the registered trademark symbol, “®”, is to be printed as a superscript of the combination mark, as illustrated to the right.

Bluetooth combination mark “free zone”

The distance between the combination mark and the edges of the free zone is equal to half the height of the “B” as shown above.

Use of the Auracast Trademarks

Requirements of Use

Use of the Auracast word mark, figure mark, and combination mark (collectively, the “Auracast Trademarks”) is only permitted under license from the Bluetooth SIG. Licensees may use the Auracast Trademarks in association with products that have completed the Bluetooth Qualification Process and indicated in the submission to the Bluetooth Qualification Process that the products implement and meet the requirements for the Public Broadcast Source (PBS) role, the Public Broadcast Sink (PBK) role, or the Public Broadcast Assistant (PBA) role as defined in the Public Broadcast Profile (PBP) Specification.

In addition, for any product that indicates in the submission to the Bluetooth Qualification Process that it implements and meets the requirements for the PBS role as defined in the PBP Specification, the product must also meet the following requirements to use the Auracast Trademarks:

- The product must be configurable by the end user to broadcast a Standard Quality Public Broadcast Audio stream (as defined in the PBP Specification) within an Auracast™ Broadcast. An “Auracast Broadcast” means an audio broadcast using Bluetooth® wireless technology that complies with the PBP Specification, including transmission of the Public Broadcast Announcement.
- If the product is marketed for use within a Public Location (where “Public Location” means any public, private, or commercial venue, building, mode of transportation, or open space), the product's default setting must be set to broadcast a Standard Quality Public Broadcast Audio stream when the product is configured to transmit an Auracast Broadcast. Products marketed for a Public Location include, for example, public address systems, assistive listening systems, or commercial televisions.*

* Public Locations that market the availability of Auracast™ broadcast audio under the Auracast Trademarks are required to provide a Standard Quality Public Broadcast Audio stream for any Auracast audio content provided by the Public Location.

Use of the Auracast Trademarks

Where to apply the Auracast Trademarks

The Auracast Trademarks may be applied on licensees':

- advertisements
- computer programs
- exhibition stands
- posters
- packaging
- point-of-sale materials
- press materials
- properly qualified and listed Bluetooth® enabled products
- product & sales literature
- radio / TV commercials
- visual aids
- website

To discuss use of the Auracast Trademarks in other contexts than listed above, contact brand.manager@bluetooth.com.

Violation

The Auracast Trademarks may not be used in a manner that could impair the goodwill associated with the trademarks or otherwise damage the reputation of Bluetooth SIG or its Members. The Auracast Trademarks shall therefore not be used in connection with products and services that do not support Auracast™ broadcast audio or in connection with unlawful, obscene, pornographic, excessively violent, hazardous, or otherwise poor-taste activities.

Use of the Auracast Trademarks

Use of the Trademark Symbol

The Auracast Trademarks should be accompanied by the trademark symbol, “TM.”

The “TM” symbol should immediately follow each individual Auracast Trademark whenever they appear on product packaging, products, web pages, marketing pieces, and in textual information. After the first and most prominent use, the “TM” symbol may be omitted from the word mark.

If use of the “TM” symbol on a product, or as part of a product display, is impractical due to the small size of the respective mark or the shape or size of the product on which the mark appears, the licensee may omit the “TM” symbol on such a product or product display, provided that appropriate language identifying and attributing the Auracast Trademarks to the Bluetooth SIG is included in printed materials accompanying the product (e.g., user’s guides, owner’s manuals, product brochures, product packaging, etc.) and the “TM” symbol is used with the Auracast word mark in the first and most prominent instances in which it appears in all literature, packaging, and other materials accompanying the product.

Trademark Attribution Footnote

Whenever the Auracast Trademarks are used in a particular piece, they must be attributed with an appropriate trademark footnote.

The footnote may be presented in small type but must be large enough to be legible. Footnotes generally appear at the end of a document or on the back of a package, but may appear at the bottom of a press release or web page or the inside cover of technical documentation accompanying the product. The footnote may be translated into any language provided, however, that the Auracast word mark and, if applicable, the Bluetooth word mark are in English or in one of the approved translations found on [page 4](#). The company name, Bluetooth SIG, Inc., must always be displayed in English. If a footnote cannot be applied on product packaging or labels due to space limitations, the footnote must be clearly printed on the product’s associated printed materials.

Recommended attribution footnotes

When using only the Auracast Trademarks:

“The Auracast™ word mark and logos are trademarks owned by Bluetooth SIG, Inc. and any use of such marks by [licensee name] is under license. Other trademarks and trade names are those of their respective owners.”

When using multiple Bluetooth Trademarks:

“The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. The Auracast™ word mark and logos are trademarks owned by the Bluetooth SIG. Any use of such marks by [licensee name] is under license. Other trademarks and trade names are those of their respective owners.”

Use of the Auracast Trademarks

Relationship to Licensee Brand; Product Naming Rule

When using the Auracast Trademarks, it should always be apparent which company is the licensee of the trademark(s); therefore, the Auracast Trademarks should always be secondary to a licensee's house mark or other trademark. The Bluetooth Trademarks cannot be the only trademark(s) used on or in connection with a licensee's product or service.

When naming licensee products, the Auracast word mark may appear in a product name but, when used as such, the trademark symbol "TM" must be added in superscript format immediately following the word mark and the word mark must be formatted in a manner designed to indicate its status as a trademark.

A licensee may not, however, embed the Auracast Trademarks in a licensee trademark, logo, or tag line, or attempt to register or otherwise claim rights in a word mark, logo, or tag line incorporating any of the Auracast Trademarks.

CORRECT

Using the "TM" symbol with the word mark and ensuring it is secondary to the licensee mark

[Licensee Mark] Bluetooth® Hearing Aid with support for Auracast™ broadcast audio

INCORRECT

Not using the "TM" symbol with the Auracast word mark in a product name, not using a licensee mark in the product name

[Licensee Mark] Auracast Speakers

Auracast™ Hearing Aid

INCORRECT

Using or attempting to register a logo or tag line that incorporates the Auracast Trademarks (examples below)

Use of the Auracast Word Mark

The Bluetooth SIG's rights in the Auracast word mark encompass all upper and lower case, bold, italicized or plain text representations of the word "Auracast."

Auracast™

Correct Form

The Auracast word mark should not be used as a noun. Upon first and most prominent uses on any given web page, brochure, packaging, advertisement, or other marketing piece, the word mark must be followed by the phrase "broadcast audio" or another secondary generic term to identify the appropriate product or service category and emphasize that the word mark is referring to a particular and authentic type of broadcast.

CORRECT Auracast™ broadcast audio

CORRECT Auracast™ transmitter

CORRECT Auracast™ receiver

Spelling

The Auracast word mark is a trademark, and as such its spelling cannot be changed. It is always to be used in either English, its Japanese translation “オーラキャスト” or its Korean translation “오라캐스트”; it must not be translated into other languages.

CORRECT オーラキャスト™ 放送オーディオ

CORRECT 오라캐스트™ 방송 오디오

CORRECT Auracast™ Übertragungsaudio

Formatting

When using the Auracast word mark in plain text, the letter “A” must be capitalized (i.e., “Auracast”) in all instances. The word mark should also be made to stand out in the text by either underlining the word mark, or displaying the mark in all capitals, italics, and/or bold font on the first and most prominent use of the mark within a particular piece.

CORRECT Support for *Auracast™* broadcast audio

CORRECT A device capable of receiving an AURACAST™ broadcast

INCORRECT Support for Aura Cast transmitter

INCORRECT A device capable of receiving an AuraCast receiver

Use of the Auracast Word Mark

No possessives or plurals or hyphenations.

CORRECT The Auracast™ audio streams

INCORRECT Auracast's audio streams

INCORRECT Auracast-broadcast

No verbs.

CORRECT: My device received the Auracast™ broadcast

INCORRECT Auracast the broadcast

No puns.

Consistent and appropriate use of the Bluetooth Trademarks benefits all Bluetooth SIG Members. Accordingly, do not make puns out of the Auracast word mark or portray it in a negative manner.

No abbreviations.

CORRECT Auracast™ broadcast audio

INCORRECT AC broadcast audio

Company, Business, and Trade Names

The Auracast word mark must not be incorporated into a company, business, or trade name.

INCORRECT Auracast Consultants, Auracast Enterprises, MyAuracast, Inc

Websites

The Auracast word mark is not to be used in a domain name. The only exception to the rule is when the word mark is used after the forward slash in a URL.

CORRECT www.companyname.com/auracast

INCORRECT www.auracast.se

Use of the Auracast Figure Mark

Format, Size, and Color

The Auracast figure mark must always be displayed in the highest quality representation. There is no minimum or maximum size requirement for the figure mark as long as, when displayed in the best possible resolution, the mark is recognizable.

Licensees must use the graphic files provided by the Bluetooth SIG when using or displaying the Auracast figure mark. Recreating, redrawing, or otherwise reformatting the figure mark is prohibited.

The figure mark can be reproduced in blue, black, or in white. When in blue, the following specification shall be used:

Pantone	CMYK
PMS 285	C: 100% M: 50% Y: 0% K: 0%
RGB	
R: 0 G: 130 B: 252	

Acceptable Auracast Figure Mark Reproduction

Unacceptable Modifications of Auracast Figure Mark

INCORRECT Using the Auracast figure mark symbol on gradient, patterned background or an image

INCORRECT Adding drop shadow, graphic emboss, or applying other graphic alterations to the Auracast figure mark

Use of the Auracast Figure Mark

Free Space

Aside from the two limited exceptions discussed below, always make sure that the integrity of the Auracast figure mark is preserved by making use of at least a “free zone” within which no text, picture, illustration, or other element shall be present. The two exceptions to the free zone requirement are as follows:

- The trademark symbol “TM” is to be printed as a subscript of the figure mark, as illustrated on the right, and should be displayed in the same color as the circle of the figure mark.
- The free zone may be reduced to a minimum of one-eighth ($1/8$) of the height of the figure mark when using the figure mark (standing alone) in electronic displays where size limitations prevent a larger free zone. For example, the free zone may be reduced when using the figure mark near the edge of an electronic display screen or adjacent to an electronic display divider line. It is not acceptable, however, to use a reduced free zone when the figure mark is displayed next to an informational element such as a company name, third party logo or other graphic element. This particular exception only pertains to electronic displays; all printed materials and product packaging must adhere to the standard “half the height of the figure mark” free zone requirement.

Auracast figure mark “free zone”

The distance between the figure mark and the edges of the free zone is equal to half the height of the figure mark as shown above.

Use of the Auracast Figure Mark

Use for Feature Activation

It is also permissible for licensees to use the Auracast figure mark to indicate activation of Auracast™ broadcast audio on products or electronic displays. When used as such, the figure mark must be displayed in blue, black, white or another solid color that is consistent with the other icons on the product or electronic display. Under these circumstances, the figure mark may also be engraved or embossed such that its color matches the product.

Please contact brand.manager@bluetooth.com with any questions concerning display of the Auracast figure mark to designate use or activation of Auracast™ broadcast audio.

Acceptable Auracast Figure Mark Reproduction

CORRECT

Using the figure mark to indicate activation on an electronic display

INCORRECT

Modifying the figure mark when used as icon to indicate activation (e.g., placing symbol over or striking through the figure mark)

CORRECT

Engraving the figure mark such that it is a solid color that matches the product and is consistent with other displayed icons

Use of the Auracast Figure Mark

Use with Software Applications

When used with software applications, as with other products, the Auracast figure mark may not be used as a standalone icon, logo, or other designation of the application. Consistent with the guidelines on [page 24](#), licensees may not alter the figure mark when displayed on or in connection with software applications.

CORRECT

Using the Auracast figure mark secondary to licensee name or brand(s) for a software application

LICENSEE LOGO

APP NAME

**INCORRECT**

Altering the Auracast figure mark for use with a software application

Use of the Auracast Combination Mark

The Auracast combination mark consists of:

- The Auracast figure mark, AND
- The Auracast word mark

When using the Auracast Trademarks on or in connection with qualified products and services that have met the additional requirements outlined on [page 18](#), it is strongly suggested that licensees use the Auracast combination mark whenever possible to build brand awareness.

To that end, the Bluetooth SIG will also permit licensees to use the combination mark with the tag line “A Bluetooth® Technology” in the specific format reflected below.

Use of the Auracast combination mark with tag line is preferred when a licensee opts only to use the Auracast Trademarks (not in combination with the Bluetooth Primary Trademarks) in connection with its qualified products and services.

See [Page 31](#) for further guidelines on use of the Auracast Trademarks with Bluetooth Primary Trademarks.

CORRECT Product packaging with only Auracast combination mark with tagline

Use of the Auracast Combination Mark

Format, Size, and Color

The Auracast combination mark must always be displayed in the highest quality representation. There is no minimum or maximum size requirement for the combination mark as long as, when displayed in the best possible resolution, the mark is recognizable. Licensees must use the graphic files provided by the Bluetooth SIG when using or displaying the Auracast combination mark. Recreating, redrawing, or otherwise reformatting the combination mark is prohibited.

The combination mark can be reproduced in three ways: blue figure mark and black word mark on light background, black figure mark and word mark on light background, and white figure mark and word mark on dark background.

It is also permissible to engrave or emboss the combination mark on a product, if this is preferred. When embroidering the combination mark on a dress shirt, it is okay to embroider it on a pin striped background. However, all other cases of embroidery should be done on a solid background.

Acceptable Auracast Combination Mark Reproduction

Unacceptable Modifications of Auracast Combination Mark

INCORRECT Altering the Auracast combination mark (e.g., moving the figure mark, using the combination mark with the word “Auracast” in the wrong font)

INCORRECT Using the Auracast combination mark on gradient, patterned background or image; adding a dropshadow, graphic emboss, or other graphic altering of the mark

Use of the Auracast Combination Mark

Free Space

Aside from the two exceptions discussed below, always make sure that the integrity of the Auracast combination mark is preserved by making use of at least a “free zone” within which no text, picture, illustration, or other element shall be present. The two exceptions to the free zone requirement are:

- The trademark symbol “TM” is to be printed as a subscript of the combination mark, as illustrated on the right, and should be displayed in the same color as the word mark.
- The phrase "A Bluetooth® Technology" may appear below the mark, as reflected in the approved format shown on [page 28](#).

Auracast combination mark “free zone”

The distance between the combination mark and the edges of the free zone is equal to half the height of the "A" as shown above.

Use of Auracast Trademarks with Bluetooth Primary Trademarks

A licensee may use both the Auracast Trademarks and Bluetooth Primary Trademarks on or in connection with its products, product packaging, and/or advertising materials. If a licensee chooses to use multiple Bluetooth Trademarks in connection with its qualified products or services, the following guidelines apply:

- The Auracast combination mark without the tagline (“A Bluetooth® Technology”) should be used.
- The Bluetooth Trademarks may not be modified (e.g., the Bluetooth word mark cannot be paired with the Auracast figure mark, etc.)

CORRECT
